

DOD Communicable Disease Weekly Report

Summary of Communicable Reportable Events by Service

Surveillance Period: 05OCT2014 to 01NOV2014

		Army		Navy		Air Force		Marine Corps	
		7 Days	28 Days	7 Days	28 Days	7 Days	28 Days	7 Days	28 Days
Enteric	Campylobacter	.	5	.	2	1	2	.	.
	Giardiasis	.	1
	Norovirus	.	1
	Salmonellosis	1	15	1	5	.	4	.	.
	Shigellosis	.	5	.	1	.	1	.	.
Vaccine-preventable	H. influenzae, invasive	.	.	.	1
	Hepatitis A	.	.	.	1
	Mumps	1	1	.	1
	Varicella, AD only	.	1
Vector-borne	Lyme Disease	.	1	.	1	2	3	.	.
Zoonotic	Leptospirosis	1	1	.	1
Tropical	Malaria	.	1	.	1	.	.	.	1
Other	Legionellosis	.	1
	Strep, Group A, invasive	.	1	.	.	.	2	.	1
	Syphilis	.	7	1	3	.	1	.	2

Only those diseases with 1 or more reported events are displayed.

Service displayed is of the affected individual's service or the sponsor's service.

Data Source: Defense Medical Surveillance System (DMSS).

Prepared by Armed Forces Health Surveillance Center (AFHSC), as of 5 November 2014.

DOD Communicable Disease Weekly Report REPORT DESCRIPTION

PURPOSE/DESCRIPTION:

This report leverages the unique capability of the AFHSC to examine reportable medical events submitted across the DoD. It provides a weekly snapshot of communicable diseases for which reporting is mandated by the Armed Forces Reportable Medical Events Guidelines & Case Definitions (revised March 2012). Its purpose is to facilitate geographic and cross-Service comparisons of communicable disease trends across the DOD particularly:

- a. at Medical Treatment Facilities (MTFs) that serve beneficiaries of multiple Services; and,
- b. in regions where multiple MTFs belonging to different Services.

FREQUENCY: The DOD Communicable Disease Weekly Report is released each week by the Armed Forces Health Surveillance Center and is posted on the AFHSC website at:
<http://www.afhsc.mil/reportableEvents>.

DATA SOURCE: Reportable events using data collected from the Services (Army, Navy, Air Force Marine Corps and Coast Guard) electronic Disease Reporting System internet (DRSi) which feeds specific variables into AFHSC's Defense Medical Surveillance System (DMSS).

CASE DEFINITIONS & CAVEATS:

1. **Case Inclusion:** Reportable events as per the Armed Forces Reportable Medical Event Guidelines & Case Definitions (March 2012). For this report, communicable diseases are grouped into 6 mutually exclusive categories: enteric, vector-borne, zoonotic, tropical, vaccine-preventable, and other.

Enteric	Amebiasis, Botulism, Campylobacter infection, Cholera, Cryptosporidiosis, Cyclospora infection, Shiga-toxin producing E. Coli, Giardiasis, Norovirus, Salmonellosis, Shigellosis
Vector-borne	Anaplasmosis/Ehrlichiosis, Arboviral Encephalitis, Lyme Disease, Plague, Rocky Mountain Spotted Fever, Typhus Fever
Zoonotic	Anthrax, Brucellosis, Hantavirus disease, Leptospirosis, Listeriosis, Q Fever, Rabies, Trichinosis, Tularemia
Vaccine-preventable	Diphtheria, invasive Haemophilus influenza, Hepatitis A, Measles, Meningococcal Disease, Mumps, Pertussis, Poliomyelitis, Rubella, Smallpox, Tetanus, Typhoid Fever, Varicella (active duty only), Yellow Fever
Tropical	Dengue Fever, Filariasis, Hemorrhagic Fever, Leishmaniasis, Leprosy, Malaria, Relapsing Fever, Rift Valley Fever, Schistosomiasis, Trypanosomiasis
Other	Coccidiomycosis, Legionellosis, Rheumatic Fever, Severe Acute Respiratory Syndrome, invasive Group A Streptococcus, Syphilis, Toxic Shock Syndrome, Tuberculosis

2. **Exclusion Criteria:** Armed Forces reportable medical events excluded from this report include influenza (due to detailed coverage in other reports), prevalent sexually

transmitted infections (chlamydia and gonorrhea), parenterally transmitted infections (hepatitis B and C), heat/cold weather injuries, vaccine adverse events and generalized outbreaks.

3. Case Confirmation: Cases included in this report are confirmed, suspect, probable, or pending, thus providing visibility of potential outbreaks while laboratory confirmation is pending. The reporting of cases definitions of confirmed, suspect or probable are available in the Armed Forces Reportable Medical Event Guidelines (March 2012).
4. Surveillance Period: The surveillance periods for this summary include the 7-day and 28-day windows preceding the date of each weekly report; events are categorized by the date that they occurred, rather than the date they were reported.
5. Population: The population under surveillance includes all DoD beneficiaries seeking medical care at MTFs. The Service affiliation of the sponsor is considered to be the Service of the affected individual for the purposes of this report. Individuals without a designated Service are not included in this report.
6. Definitions / Clarifications:
 - Counts represent unique individuals from any data source. Cases counted in the 7-day column are included in the 28-day column.
 - Numbers with an asterisk indicate that the Service affiliation of the affected individual (Service Member or beneficiary) and of the reporting MTF differ.
 - The Summary by Service table provides counts of communicable disease events by Service of the reporting MTF. Only those diseases with events are displayed.
 - The Cases by MTF tables provide counts of communicable disease events by the geographic location and name of the reporting MTF only for conditions reported by 2 or more Services during the surveillance period.
 - The Cases by MTF tables are displayed by precedence of the MTFs' ZIP codes thereby providing a regional/geographical arrangement to the MTFs displayed.
 - The only identifiable data included in this report are the locations of the reporting MTFs. When needed, information sharing for public health investigations is provided through secure channels to public health personnel identified by agreement among the Services' Public Health hub representatives.
 - The Armed Forces Reportable Medical Events Guidelines & Case Definitions (revised March 2012), are available on-line at:
<http://www.afhsc.mil/reportableEvents>
